

01 - Who Watches the Watchers?

Who knows what sort of poison they've been putting in our water?
FEMA secret government the new world order
Building concentration camps from New York to California
So one time y'all who watches the watchers?

Our vocal vials bounce a style wars poster off the wall
As plots unfold some go over and out of control
But it's all in a role so call me Reefer Sutherland
This dust cloud's a club joint about the secret government
They keep on pushing them issues, agendas, and pencils
Getting everybody enveloped in revenue central
Lincoln Continentals with a drop-top on your mental
Embezzling executive officials is essential
Who been through it said true let's execute it
Getting Buddha with the music gets rid of this nuisance
Oo shit illusions they ruined many schemes
Like Generation RX did to Genovese
And if the shoe fits God bless you better peace
That shopping mall mentality puts Adderall to sleep
So add up all your beats and add up all your rhymes
And one Versive verse could outshine 'em all combined
I'm diamond with a rhyme but not rhyming just for dimes
If dollars are bottom line I'm sane and the world's lost her mind
This girl's all behind you spitting mad at her
Rip a mag wrapper Alice in Wonderland with this Mad Hatter
It's a rad chapter manufacturing radicals
Why'd they burn piles of books at state capitols?
Let's stay factual founding fathers looked androgynous
Not Afrika Bambaataa but cannibal Washingtonians
I'm feeling claustrophobic in the 4-door B.M.
'Cause the Nazi logo got me thinking all Austrian
My fam's Eastern European Jewish descendents
Who immigrated to New York before the holocaust crescendoed
But some of them didn't and as far as I know they all perished
Even though we never met their spirits are cherished
These are serious lyrics you better treasure this shit
Before federal censorship labels it terrorist threat

02 - Womb of the World

Fascist bastards claiming that I can't rap
Ain't laughing catching Anthrax from tampered with mail stacks
No matter the address you're rarely fairly taxed and
Buried deep in a Sleepy's mattress or a trash bin
Lifeline heart supplying metronome for beats
While my teeth are built-in mini microphones for speech
Which anoints thoughts amplified by this voice box
50 % of listeners' heads will flip like a coin toss
Omens created with a dangerous paint brush
Dipped in Damien's brain blood Satan's son's cranium erupts
From spontaneous combustion it's nothing god
Just some nauseating cluster suckers up in these stars
Can't number these bars causing more uproars
Than all figures of religious icons in existence
Mind escapes from New York like Snake Plissken
The womb of the world spawns new thoughts I make living

What's the word? Yo the word is the womb of the world
So what's the word? Yo the word is the womb of the world
So what's the word? Yo the word is the womb of the world

Some of y'all codependents like crooked codefendants
Don't know all my damn lessons but I know your stank essence
On some tampered evidence the whole style entropy
A drunk baller dies hitting trees in the snow like Michael Kennedy
Left behind a red slippery slope of a legacy
Let it be but if there's one thing that sticks in your memory remember this
His relative was a wealthy kid in Greenwich, Connecticut
Got jelly and killed some 15 year old chick
Brother's alibi was masturbating in a tree
I'm not playing I saw the documentary on A&E
Basically it's a coin toss watch with your 3rd eye
It flips around in the air and then lands on its 3rd side
Rod Serling type narratives: can't see me not hearing it
Smile for the cameras you Twilight Zone character
I said smile for camera cut check your mascara 'cause
Life is like a show called death in America

03 - Cobble Crumbles

I'm setting off her orgiastic tendencies pure chemistry
You might say sorry I missed the party of the century
Oh me oh my oh the legendary style
Proclaimed you've never seen it in your wildest stoned dreams
Okay proceed to proteins and daily vitamins
Rhymings thanking God that Ramen's only 90 cents
Economist competence call it what you want to call it
Just keep your wallet in your front pocket kid that's common sense
I play the game so I save my change
And even if the waitress is banging she still gets tipped the same
I will get slipped some brains on occasion no paying though
We get down to funky jazz while y'all get down to reggaeton

The hip-hopping skip rock spins on through puddles
Thought outside the box is caught in bottled bubbles
Let's get it popping fatal clichés piled bundles
I'm writing on the wall while its cobble crumbles

04 - The Demonstration

The sharpest sounds so lively
Students everywhere after school laughter it's Friday
Hopping on the bus stopping at the corner store to cop a dutch
Oh no they knocked it down and put up a Starbucks
Who wants what? The phone number of your dopest co-worker
That's my order spill the beans and hold the water
Son I told you I've got a thing for girls in specs
Ever since that librarian so very into
Oh Mary she romantically depressed but merry at her desk
'Cause we met up on her lunch break and Mary sucked sess
Fuck yes it was daily hooky
Dickens in the section where them fiction text books be
Excuse me afterwards I'd borrow a novel
And ask my frizzy-haired nerd cutie same time tomorrow
She says alright and I says okay
And parted ways with the smartest smiley face like have a nice day

D-d-d-d-d-demo-demo-demonstration x8

This is a demonstration I hear demons on the station
Radio playlist tasteless rotation
Fatal one hit crossover pop artists
And the program directors man they're older than stardust
Nowadays our best rappers talk on VH1
But VH1 stands for defamation
It's fake garbage made to please mainstream markets
They claimed the culture's dead then they went and raped the carcass
Vultures Elrond like John Travolta ultra gone
Probably partying on a boat Cruise with Tom
Or an apartment complex in Boca Raton
A group of Scientologist getting their brainwash on
Nah dog it's off topic nah God it's all logic
The poisonous products they all destroying environments
And I'm not buying it 'cause it's a pile of shit
It's false righteousness somebody please off these suppliers quick

D-d-d-d-d-demo-demo-demonstration x8

Barely any respect left in the game
So when I come to set it I must represent from whence I came
Truthfully though don't really roll with mad associates
My cover art is bugged out Underground Thelonious
How appropriate! A poster hanging on the wall here
All things move in cycles fall to spring all years
But what if global warming wipes Long Island off the map?
Fuck that my words are bringing all four counties back
Rising from Atlantis like Sub-Mariner Namor
Lobster ravioli calamari crab cream sauce
The feast starts with a secular peace talk
Like thank you for these bountiful gifts from out the seashore
Jones Beach yo that's nearby residing
And if Jones Beach maybe one day I retire in
Admiring new Diamonds on the boardwalk it's light through prisms
And it's all lovely and plus we got the flyest wisdoms

D-d-d-d-d-demo-demo-demonstration x8

05 - Times Change

I brings it back like spinal taps after an awesome
Springboarding bodysurfing accident
Wave splashes in and then my chest smashed the sand
Vertebral column folded like an actual accordion
So word to the grand scheme of things in this wasteland
Either take your leave or make amends and shake hands
Scenarios may change yet I still can't break-dance
Morey boogie Mookie Buckner you could be 86'ed
'Cause the world's serious and we don't have time for no waiting list
Hurricane season vacationers live dangerous
While them shiny objects go obsolete like laserdisc
You sounding constipated yet ironically I can't take this shit

Pick it up like drinks of rum from a sippy cup
When kids be young parents administered it to numb their gums
Pick it up like drinks of rum from a sippy cup
When kids be young parents administered it to numb their gums

I'm puffing bomb marijuana then eating mom's lasagna
Y'all ain't already prepared for revolution then it's probably on ya
But not for property profits nor any other novelty topics
It's how y'all perceiving down with the government copters
How're y'all receiving my sounds versus my optics
I'm a 16th round champion of audio boxing
Psychedelic sample flip the audible options
This is America pal now get your paws out of my pockets
And the claws out of your conscience that's true nonsense
Plastic rap performances are absolutely obnoxious
Y'all acting like some action figure stature contortionists
I figure that there's more to this than dance moves and choruses
Do the Captain Planet recycle trash out the garbage and
While you're at it flush that fish down for toilet spins
Wish I could say I'm just playing but god forsaken
Standards been lacking and now the times are changing

06 - Lullaby

Fast asleep after I write the rhyme working on survival tactics
It's like burning alive how they learning the bible backwards
But nah I'm not gon' babble on no matter of factions
And if our beards are half Osama Bin Laden's well you can bet your Scrabble chips
That he's dead find the body as controversy arise
No surprise the populace calling its code disguise
Yo 5-1-6 it's time to socialize you've gotta know why
Hugo Chavez was right, riiight?

Cool Karate Kid culprit cobra kai
We all could die searching for that ultimate high
Illuminati lullaby's like a ghost in the sky
Dominant hoaxes hocus pocus focus your eyes

Versive the rhyming diamond live on arrival wilding
For Strong Island style and profile
Got a compost pile fertile soil cultivator
Plot multiple layers don't care if you dig it or not
This rhythm is hot as bodega bootleggers basing
And shareholders trading freedom of information
Sipping and tasting overflowing open containers
Teenagers get wasted then a ticket from cops
What's the statistical plot? Just numbers on the surface
What's worse is wicked systems determine what your worth is
Word bitch we're broken down into purchase patterns
I ain't bugging out I'll live a merchant craftsman's life
Y'all can keep them frequencies and satellites
To eat and feed the deep MCing appetite
So let me pass the mic oh wait nobody's left alive
Sorry and goodnight Illuminati lullaby

Cool Karate Kid culprit cobra kai
We all could die searching for that ultimate high
Illuminati lullaby's like a ghost in the sky
Dominant hoaxes hocus pocus focus your eyes
Cool Karate Kid culprit cobra kai
We all could die searching for that ultimate high
Illuminati lullaby's like a ghost in the sky
Dominant hoaxes hocus pocus closes your eyes

07 - Off the Hinges

A shrieking creak at the door entrance it's off the hinges
Slowly creep through just watch where your head is
An awful presence lurks about putrid messes murder's foul
Stench of wreckages funky like a 70's record except a deadlier message
This haunting power aura sound
I'ma stomp the pestilence which crawls on the ground
This horror house is not the one in Amityville
I pissed on the lawn there and still haven't been thrilled
Yea that's for real like a massacre merciless
Murky mists appear in killing fields and furnaces
Versive kids demented scientist like Doctor Copernicus
Samuel Diamond is recording supernatural disturbances
A poltergeist a white noise a small child calling for mom
Bathtub leaking blood paranormal phenomenon
The oven turns on reach to flip the off dial
Step in a slippery green ooze split your wig on floor tiles
(You're gone now)

08 - Endless

Phantasmic brass crashes hear it as the mirror's glass shatters
Eerier than black magic burials with cracked caskets
Experience madness evil messiah violent animal
A quiet coastal town gets overrun by zombie cannibals
Find a father fiending for f-flesh of Marianna Hill
66 sick scriptures etched into your final will
He stands still own daughter thought him just another sculpture
Just because the blood's drained that doesn't make it kosher
You frustrated settle down stress causes ulcers
We've got enough problems with the corpses at the grocers
And the locusts and the cobras and the vultures yo it's over
Time to relocate to South or North Dakota
Cold and isolated regardless of seasonal stages
They've got an arsenal waiting and they're staging the sieges
Take it or leave it y'all misbehaving make believers
Can pray for your demons vacationing on ancient vacant beaches
I awaken from what seemed to be an ancient sleep
Haunting imagery decreed the requiem for a dream
I mean it's over I think eyes open and blink
I rush into the restroom dunk my dome in the sink
Holding the brink of insanity between gasps for breath
Nightmarish cemeteries where cadavers stay fresh
As one second fades to death time manifests
As one second fades to death I resurrected
Luca Brasi Giuliani ought to be the arch rival
Non-libel nah yo New Yorker war monger boss gone wild
My Strong Isle dark smile results from the crossfire
Of frostbiter wisenheimers coughing up bile
Hey yo pardon this funky sound check prophetic like unborn child kicks
I'm so far ahead of my time your watch will stick
In one spot clocks get set still ticekty tock stop a sec
Relatively consequential cause and effect
Miss Polly wants to politic probably 'cause she's on some shit
Obviously caught up in these dollars and cents
See that's the problem with debt the stock market could hit
Rock bottom tomorrow then what you borrowed gets spent
On god-awful reprints of gone with the wind lost files
Talk bible scriptures scripting fiction pictures false idols
Pop bottles after sabotaging lodges with Adam Rothschild
Phantom goth models crack her monster out the gargoyles
